Installation Instructions

If you have an older SmartGit version installed, exit SmartGit (Windows and Linux: using Repositories | Exit, macOS: using Cmd+Q).

Windows (installer bundle)

- unpack the downloaded zip file,
- launch the installer and follow the instructions

Windows (portable bundle)

- unpack the downloaded 7z file into an arbitrary directory of your choice (don't unpack over an existing installation!),
- start SmartGit: invoke `bin\smartgit.exe`

macOS

- double-click the downloaded dmg file
- copy the contained application directory structure to a directory of your choice (typically `/Applications`)
- if you prefer, drag & drop the application to the dock to create an icon

Linux (tar.gz bundle)

- unpack the downloaded file into a directory of your choice (don't unpack over an existing installation!):
  `tar xzf <smartgit*.tar.gz>`
- start SmartGit: invoke `bin/smartgit.sh`
- create SmartGit menu item: invoke
  `bin/add-menuitem.sh`
- remove SmartGit menu item: invoke
  `bin/remove-menuitem.sh`

Linux (deb bundle)

- install SmartGit:
  `sudo dpkg -i <smartgit*.deb>`
- if some dependencies are unmet, invoke
  `sudo apt --fix-broken install`
